DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03/02/10 has been entered.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

The drawings were received on 03/02/10. These drawings are acceptable.

Response to Arguments

Applicant's arguments, see pages 9-11, filed 03/02/10, with respect to the rejection(s) of claim(s) 1-8, 10-16, and 19-31 under 35 U.S.C. 102(b) as being anticipated by Hagino US 2001/0016891 have been fully considered and are generally persuasive. In particular, Examiner agrees with Applicant's argument on page 11 that the Hagino's control signal for motor driving is not for configuring field device 130F, and therefore, neither of communication CPU 124 or

Art Unit: 2121

132 processes data for configuration of a field device 130. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of DE 297 06 969 U1.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8, 10-16, 19-25, and 27-32 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by DE 297 06 969 U1 (provided by Applicant).

For example, the English Translation of DE 297 06 969 U1 (provided by Applicant) discloses:

1. A method comprising:

situating a configuration device (e.g., Fig. 1 #5) at an installation location in a system, wherein the configuration device is configured for coupling to an intelligent unit (e.g., Fig. 1 #1), and is not a component of said intelligent unit; and

storing data in the configuration device, pertaining to the installation location (e.g., pg. 4 lines 22-28, claims 5-6),

wherein the data comprises behavior or function description data for the intelligent unit (e.g., pg. 4 lines 6-12), and

Art Unit: 2121

wherein the data is transmitted from the configuration device to a logic device (e.g., pg. 3: “software of the control unit”, “software driver”) that processes the data for configuration of the intelligent unit (e.g., pg. 4 lines 6-12, pg. 5).
